## **Animal Cloning: The Science of Nuclear Transfer (New Biology)** Joseph Panno

Nature has been cloning molecules, cells, and animals for millions of years. Just 34 years ago, biologists began to successfully emulate this natural process when John Gurdon of Cambridge University cloned a frog. Nature's motivation for cloning is a question of survival, but modern science's motivations for conducting experiments in cloning are often controversial. *Animal Cloning* presents the history and basic facts about cloning and discusses the questions and controversies surrounding this relatively new area of science. This in-depth yet highly readable volume examines all aspects of animal cloning, including its controversial nature, from a neutral standpoint. Well-written entries discuss natural cloning and early cloning experiments beginning in the 1950s; the research that led to the creation of Dolly, the first animal cloned from an adult cell; as well as the recent sheep-human, goat-human, and pig-human hybrids scientists have experimented with using cloning technology. Substantial coverage deals with the driving forces behind cloning research, including the production of large quantities of medically important proteins such as blood clotting factor IX, used to treat hemophilia B; human serum albumin, used to treat burn victims; and anti-thrombin III, an anti-clotting protein used to treat heart attack and stroke victims. While the focus is on animal cloning, specific coverage of human cloning is also presented. Concluding this debate, an entire chapter presents different points of view on cloning and describes relevant legislation that has been passed or proposed in the United States, Canada, and Europe. Facilitating research, biographies of key researchers in this new and quickly advancing area of science are included along with a bibliography and glossary.

### **From reader reviews:**

#### **Barry Phelan:**

Nowadays reading books be a little more than want or need but also get a life style. This reading addiction give you lot of advantages. Advantages you got of course the knowledge the rest of the information inside the book this improve your knowledge and information. The information you get based on what kind of guide you read, if you want attract knowledge just go with training books but if you want sense happy read one along with theme for entertaining including comic or novel. Often the Animal Cloning: The Science of Nuclear Transfer (New Biology) is kind of publication which is giving the reader capricious experience.

#### **Cheryl Phelps:**

A lot of people always spent their own free time to vacation or go to the outside with them loved ones or their friend. Do you know? Many a lot of people spent these people free time just watching TV, or even playing video games all day long. If you would like try to find a new activity honestly, that is look different you can read the book. It is really fun for you personally. If you enjoy the book you read you can spent all day every day to reading a publication. The book Animal Cloning: The Science of Nuclear Transfer (New Biology) it is quite good to read. There are a lot of individuals who recommended this book. We were holding enjoying reading this book. In the event you did not have enough space to deliver this book you can buy the e-book. You can m0ore simply to read this book out of your smart phone. The price is not to cover but this book features high quality.

#### **Daniel Rhoads:**

You may get this Animal Cloning: The Science of Nuclear Transfer (New Biology) by go to the bookstore or Mall. Merely viewing or reviewing it could possibly to be your solve problem if you get difficulties on your knowledge. Kinds of this reserve are various. Not only by written or printed but in addition can you enjoy this book simply by e-book. In the modern era such as now, you just looking by your local mobile phone and searching what their problem. Right now, choose your own personal ways to get more information about your publication. It is most important to arrange you to ultimately make your knowledge are still revise. Let's try to choose right ways for you.

#### **Rose Ibarra:**

What is your hobby? Have you heard that question when you got students? We believe that that issue was given by teacher with their students. Many kinds of hobby, Every individual has different hobby. Therefore you know that little person similar to reading or as studying become their hobby. You have to know that reading is very important and also book as to be the point. Book is important thing to increase you knowledge, except your personal teacher or lecturer. You see good news or update in relation to something by book. A substantial number of sorts of books that can you decide to try be your object. One of them are these claims Animal Cloning: The Science of Nuclear Transfer (New Biology).
