Events, Society and Sustainability: Critical and Contemporary Approaches (Routledge Advances in Event Research Series)

Events, Society and Sustainability: Critical and Contemporary Approaches (Routledge Advances in Event Research Series)

The growth of the events industry brings with it concerns of sustainable management, the sharing of available resources, and ensuring that people and places are not over-exploited. While the environmental and economic dimensions of sustainability have attracted a reasonable attention in the study of events, the social and cultural aspects of sustainability have been largely neglected. This book brings together emerging critical perspectives, innovative conceptual frameworks and contemporary case studies. Events cannot be isolated from the actions of humans and this is reflected in the emphasis on people and society throughout. The next wave of sustainable discourse requires a critical synthesis of information and this book is the first to address the need for more critical approaches and a broader way of thinking about events and sustainability.

Divided into five thematic parts, the contributions delve into understanding the mainstream stances towards sustainability, the role events play in indigenous cultures and in diasporic communities, and the extent to which events influence the public discourse and civic identity. Sustainability is also examined from a strategic perspective in the events sector, and consideration is given to issues such as corporate social responsibility, greenwashing, and the power of multi-stakeholder alliances in promoting sustainability goals.

Written by leading academics, this timely and important volume will be valuable reading for all students, researchers and academics interested in Events and the global issue of Sustainability.

James Crist:

As a college student exactly feel bored to help reading. If their teacher expected them to go to the library or even make summary for some e-book, they are complained. Just tiny students that has reading's heart or real their passion. They just do what the instructor want, like asked to the library. They go to at this time there but

nothing reading significantly. Any students feel that reading through is not important, boring and can't see colorful photographs on there. Yeah, it is to get complicated. Book is very important for you. As we know that on this period, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this Events, Society and Sustainability: Critical and Contemporary Approaches (Routledge Advances in Event Research Series) can make you truly feel more interested to read.
