Destroyer Campbeltown: Anatomy of the Ship Series Al Ross

The destroyer *Campbeltown* is not only famous for her part in the commando raid on the St. Nazaire dry dock in 1942, but is also representative of an important type. Built as the USS *Buchanan* (DD131), she was one of over 270 flush-decked destroyers put into service towards the end of World War I. Sent to Great Britain under the Lend-Lease program and renamed *Campbeltown*, she spent eighteen arduous months on convoy duty, before being selected for a hazardous mission to deny the Nazi warship *Tirpitz* the use of repair facilities at the French port of St. Nazaire. During the desperate but successful operation, the *Campbeltown* rammed the port's lock gates. Eleven hours later, delayed action fuses set off four-tons of explosives that destroyed both the ship and the docks. Over 200 perspective and 3-view drawings accompany the in-depth description of this distinguished ship along with a large-scale plan on the jacket cover's reverse that is new with this reprint.
