Einstein Biography (Chinese Edition) Jurgen Neffe

Used to be called the brain of the whole century, Albert Einstein brought fundamental changes to our outlook on the world. Albert Einstein was born in Ulm, Germany in 1879, and moved to Switzerland after 1896. In 1905, which has been called Einsteins annus mirabilis (miracle year), he developed the most famous theory of relativity. In 1914, he moved to Berlin, and in 1921, he was awarded the Nobel Prize in Physics. In 1933, he was compelled to flee Germany and thereafter took up a position at the Institute for Advanced Study (in Princeton) until his death in 1955. Einsteins life is a combination of turbulence and magnificence. He is not only the most famous natural scientist but also stays in peoples memory as a reverse thinker, a maverick, and a person capable of thinking intelligently about politics. He wrote history with his equation $E=mc^2$, which is equally popular as his silly and famous picture of sticking his tongue out.
