Green Building with Concrete: Sustainable Design and Construction

Green Building with Concrete: Sustainable Design and Construction

With superior fire resistance, strength, and a long service life, concrete is the most widely used construction material in the world. A sustainable material, concrete is also easily and affordably reused and rehabilitated. The first book to provide an overview of sustainability and concrete, **Green Building with Concrete: Sustainable Design and Construction** surveys the material's history in the green building movement and presents state-of-the-art methodologies and best practices.

From the manufacturing of cement to the rehabilitation of concrete, this comprehensive book explains how concrete can be used for sustainable design and construction. It offers insight into new technological and social developments guiding the introduction of green buildings and examines the attributes that concrete has to offer the green building movement. The text also highlights research on economic analysis—particularly life cycle costing—to provide a full picture of the economic benefits of concrete. Expert contributors from around the world offer diverse viewpoints on global sustainability.

Topics covered include:

- Principles of sustainable design
- Benefits of concrete's thermal mass
- Mitigation of urban heat island effects
- Surface runoff and the application of pervious concrete for sidewalks and parking areas
- Reduction of construction waste
- Leadership in energy and environmental design (LEED) standards

Emphasizing environmental impact and occupational and consumer health and safety, this book explains how to make the most of concrete in sustainable design. Written for university and concrete industry continuing education courses, it also serves as a reference for building owners and industry professionals who recognize the value of green building.

From reader reviews:

Marcus Leiva:

Have you spare time to get a day? What do you do when you have far more or little spare time? Yes, you can choose the suitable activity intended for spend your time. Any person spent all their spare time to take a wander, shopping, or went to the Mall. How about open or even read a book titled Green Building with Concrete: Sustainable Design and Construction? Maybe it is to be best activity for you. You realize beside you can spend your time with your favorite's book, you can smarter than before. Do you agree with it has the opinion or you have some other opinion?

Ronald Ybarra:

Information is provisions for folks to get better life, information currently can get by anyone in everywhere. The information can be a expertise or any news even a concern. What people must be consider when those information which is inside former life are challenging be find than now could be taking seriously which one would work to believe or which one the particular resource are convinced. If you find the unstable resource then you get it as your main information you will see huge disadvantage for you. All of those possibilities will not happen within you if you take Green Building with Concrete: Sustainable Design and Construction as the daily resource information.

Robert Thomas:

The reason why? Because this Green Building with Concrete: Sustainable Design and Construction is an unordinary book that the inside of the publication waiting for you to snap that but latter it will zap you with the secret this inside. Reading this book beside it was fantastic author who have write the book in such remarkable way makes the content interior easier to understand, entertaining method but still convey the meaning entirely. So , it is good for you because of not hesitating having this any more or you going to regret it. This phenomenal book will give you a lot of rewards than the other book get such as help improving your proficiency and your critical thinking approach. So , still want to hold off having that book? If I ended up you I will go to the book store hurriedly.

Joan James:

Playing with family in a park, coming to see the water world or hanging out with close friends is thing that usually you could have done when you have spare time, in that case why you don't try factor that really opposite from that. One activity that make you not feeling tired but still relaxing, trilling like on roller coaster you have been ride on and with addition info. Even you love Green Building with Concrete: Sustainable Design and Construction, it is possible to enjoy both. It is great combination right, you still wish to miss it? What kind of hang type is it? Oh occur its mind hangout guys. What? Still don't have it, oh come on its identified as reading friends.
