Programming Languages: An Active Learning Approach

Kent D. Lee

Programming Languages: An Active Learning Approach Kent D. Lee

Programming Languages: An Active Learning Approach introduces students to three programming paradigms: object-oriented/imperative languages using C++ and Ruby, functional languages using Standard ML, and logic programming using Prolog. This interactive textbook is intended to be used in and outside of class. Each chapter follows a pattern of presenting a topic followed by a practice exercise or exercises that encourage students to try what they have just read. This textbook is best-suited for students with a 2-3 course introduction to imperative programming.

Key Features: (1) Accessible structure guides the student through various programming languages. (2) Seamlessly integrated practice exercises. (3) Classroom-tested. (4) Online support materials.

Advance praise:

“The Programming Languages book market is overflowing with books, but none like this. In many ways, it is precisely the book I have been searching for to use in my own programming languages course. One of the main challenges I perpetually face is how to teach students to program in functional and logical languages, but also how to teach them about compilers. This book melds the two approaches very well.” -- David Musicant, Carleton College

From reader reviews:

Harold Walsh:

Information is provisions for those to get better life, information presently can get by anyone at everywhere. The information can be a understanding or any news even a concern. What people must be consider whenever those information which is in the former life are difficult to be find than now's taking seriously which one is acceptable to believe or which one typically the resource are convinced. If you have the unstable resource then you buy it as your main information there will be huge disadvantage for you. All those possibilities will not happen within you if you take Programming Languages: An Active Learning Approach as the daily resource information.

Robert Rooks:

Hey guys, do you wishes to finds a new book you just read? May be the book with the headline Programming Languages: An Active Learning Approach suitable to you? The actual book was written by well known writer in this era. The actual book untitled Programming Languages: An Active Learning Approach is the one of several books that will everyone read now. This particular book was inspired a number of people in the world. When you read this reserve you will enter the new dimension that you ever know previous to. The author explained their concept in the simple way, consequently all of people can easily to know the core of this book. This book will give you a lots of information about this world now. So that you can see the represented of the world with this book.

Deborah Rost:

Reading a publication can be one of a lot of task that everyone in the world really likes. Do you like reading book and so. There are a lot of reasons why people enjoyed. First reading a book will give you a lot of new facts. When you read a e-book you will get new information mainly because book is one of several ways to share the information or perhaps their idea. Second, reading through a book will make a person more imaginative. When you looking at a book especially fictional book the author will bring you to definitely imagine the story how the personas do it anything. Third, you could share your knowledge to others. When you read this Programming Languages: An Active Learning Approach, you could tells your family, friends in addition to soon about yours reserve. Your knowledge can inspire others, make them reading a reserve.

Jennifer Shipley:

As a pupil exactly feel bored to help reading. If their teacher questioned them to go to the library or even make summary for some reserve, they are complained. Just very little students that has reading's heart or real their passion. They just do what the educator want, like asked to go to the library. They go to presently there but nothing reading critically. Any students feel that studying is not important, boring along with can't see colorful photographs on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this era, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's

country. Therefore this Programming Languages: An Active Learning Approach can make you really feel more interested to read.
