Modeling and Analysis of Enterprise and Information Systems: From Requirements to Realization
Qing Li, Yuliu Chen
Modeling and Analysis of Enterprise and Information Systems – From Requirements to Realization discusses the basic principles of enterprise architecture and enterprise modeling. After an introduction to the field the General Enterprise Modeling Architecture is presented. The new architecture includes a set of models and methods. It describes different aspects of the system and covers its life cycle. Its models are structuralized models with multi-layers and multi-views. They are descriptions and cognitions of the system at the top level and provide tools and methodology to understand, design, develop and implement the system. This book is intended for researchers and graduate students in the field of industrial engineering, management engineering and information engineering. Enterprise Models discussed in this book provide a rich source in enterprise diagnosis, business process reengineering and information system implementation. Dr. Qing Li and Prof. Yu-Liu Chen both teach at the Department of Automation, Tsinghua University.

From reader reviews:

Donna Kerns:

Have you spare time for the day? What do you do when you have far more or little spare time? Yeah, you can choose the suitable activity for spend your time. Any person spent their own spare time to take a stroll, shopping, or went to often the Mall. How about open as well as read a book allowed Modeling and Analysis of Enterprise and Information Systems: From Requirements to Realization? Maybe it is being best activity for you. You understand beside you can spend your time together with your favorite's book, you can better than before. Do you agree with their opinion or you have various other opinion?

Donald Link:

A lot of people always spent their own free time to vacation or go to the outside with them household or their friend. Do you know? Many a lot of people spent they will free time just watching TV, or perhaps playing video games all day long. If you wish to try to find a new activity here is look different you can read a book. It is really fun for you. If you enjoy the book that you simply read you can spent all day long to reading a e-book. The book Modeling and Analysis of Enterprise and Information Systems: From Requirements to Realization it is quite good to read. There are a lot of people who recommended this book. They were enjoying reading this book. When you did not have enough space to deliver this book you can buy the particular e-book. You can m0ore simply to read this book through your smart phone. The price is not to fund but this book features high quality.

John Martindale:

People live in this new time of lifestyle always aim to and must have the time or they will get lot of stress from both lifestyle and work. So , if we ask do people have extra time, we will say absolutely indeed. People is human not a robot. Then we request again, what kind of activity do you possess when the spare time coming to you actually of course your answer will probably unlimited right. Then do you try this one, reading books. It can be your alternative within spending your spare time, the particular book you have read is definitely Modeling and Analysis of Enterprise and Information Systems: From Requirements to Realization.

Florence Ross:

As a scholar exactly feel bored to reading. If their teacher asked them to go to the library in order to make summary for some publication, they are complained. Just small students that has reading's spirit or real their interest. They just do what the instructor want, like asked to the library. They go to presently there but nothing reading very seriously. Any students feel that examining is not important, boring in addition to can't see colorful pics on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore this Modeling and Analysis of Enterprise and Information Systems: From Requirements to

Realization can make you really feel more interested to read.
