Ethics in the Classroom: Bridging the Gap Between Theory and Practice Dan Mahoney

What happens when teachers face difficult options? Examining ourselves_why we do what we do_is the very essence of human psychology and of ethics. The purpose of this book is not to illustrate the difference between right and wrong, but to show how educators might choose among ethical approaches to decision-making as they face the difficult choices they make every day. However, to be just and ethical, we need to know something about the demands of justice and how they apply in our own circumstances. What is fair? What is just? How do we decide? These are the central concerns of this book. Outstanding features of this book include the theory-based ethics and case studies of real and significant issues that teachers face in P-12 classrooms.
