This book discusses minting and financial policy in the first three centuries of the Roman Empire. By studying Roman coin-survivals in a wider context, the author uncovers important facts about the origin of coin hoards of the Principate. The resulting analyses use extensive coin material collected for the first time. Dr. Duncan-Jones builds up a picture of minting, financial policy and monetary circulation that adds substantially to our knowledge and that stands as the only study of its kind for this period.
